

Information Security Policy

Our mission is to make business processes work better.

Our core values: We inspire through modern ideas, real-life experiences and lasting partnerships to change perspective, encourage growth, improve decision making and create quality solutions.

In order to achieve our mission and goals, we continuously improve the quality and information security of our services, pay special attention to increasing the professional skills of our staff, ensuring the continuity of our business, and the availability, integrity and confidentiality of information belonging to our clients and our company.

In all our business activities, we take into account the legal requirements and professional guidelines that affect our field of activity, the needs of our clients, the expectations of our interested parties and the security of information within our organisation.

We are committed that we process and retain all data and information relevant to our services confidentially according to the requirements. We implement appropriate and necessary technical measures to protect data and information.

The management system of **BPiON Group** has been developed according to the requirements of **ISO/IEC 27001:2022**.

We provide training to ensure that our information security policy is known and understood by our employees.
